EDUCATION

Plaksha University

Mohali, Punjab, India

B.Tech. in Computer Science and Artificial Intelligence; Minor in Technology Entrepreneurship

Expected May 2027

- **Academic record:** CGPA: 8.97/10 (85.2% equivalent); full scholarship recipient.
- **Coursework:** Advanced Natural Language Processing, Reasoning with Large Language Models, Machine Learning, Deep Learning, Reinforcement Learning, Data Structures and Algorithms, Operating Systems.

EXPERIENCE

Flipkart

Bangalore, India

Business Analyst Intern, AI Committee

May 2026 – Jul 2026

- **Applied AI:** Analyzed large-scale e-commerce data and contributed to applied AI deployment, business analytics, and internal AI strategy discussions.

Plaksha University

Mohali, Punjab, India

Research Intern, Healthcare AI and Clinical Intelligence – Prof. Sunita Chauhan

Dec 2025 – May 2026

- **Clinical NLP:** Contributed to LLM-assisted pipelines for longitudinal radiology, paired-report extraction, RECIST-oriented oncology tracking, temporal reasoning, and queryable fact graphs.
- **FindingFrame evaluation:** Contributed to the in-preparation FindingFrame extension, which reached 0.855 finding-type macro-F1 across 300 reports and a 95.2% evidence rate on a separate 208-question QA benchmark.

Plaksha University

Mohali, Punjab, India

Student Intern – Prof. Anish Chowdhury

Jun 2025 – Aug 2025

- **Curriculum analysis:** Built a React and Tesseract.js tool with Azure OpenAI embeddings that identified syllabus gaps for lateral-entry students 10x faster than manual comparison.
- **Analytics agent:** Developed a Streamlit agent that generated visualizations, statistical summaries, and natural-language insights from CSV and Excel files.

Lab for Economic Behaviour in Organisations

Mohali, Punjab, India

Research Assistant

Jun 2024 – Sep 2024

- **Research data pipelines:** Scraped and preprocessed large research datasets with Python, Selenium, BeautifulSoup, and proxy rotation; synthesized literature reviews.

PUBLICATIONS AND RESEARCH

The Fact Graph: A Unified Ontological Representation for Multi-Modal Clinical Intelligence: Accepted at IntelliSys 2026 (Springer SVPROC). Contributed LLM-assisted extraction, temporal reasoning, and fact-graph architectures for longitudinal clinical event timelines.

SAC's Entropy Coefficient as an Implicit Success Signal in Robotic Manipulation: Sole-author poster accepted at CAISc 2026. Ran 128 experiments across five Meta-World tasks; an entropy threshold classified 23/24 seeds (96%) on the hardest tasks, while fixed annealing reduced final returns by up to 98%. OpenReview.

PROJECTS

Bugzer – AI Multi-Agent Web QA System | Python, FastAPI, Next.js, Docker, GCP: Built browser agents that discover bugs and generate reports from console logs, network traces, latency metrics, and screenshots, with LLM-assisted debugging recommendations.

Quad – Educational Platform | Next.js, Supabase, PostgreSQL, TypeScript: Built scheduling, calendar sync, authentication, and video-management workflows for a Bharti Airtel Foundation Hackathon platform used by 100+ schools.

TECHNICAL SKILLS

Languages: Python, C++, C, MATLAB, JavaScript, TypeScript, SQL, Shell Scripting.

AI/ML: Machine Learning, Natural Language Processing, Large Language Models, Clinical NLP, Reinforcement Learning, Bayesian Inference, OCR, Data Analysis.

Frameworks and Tools: PyTorch, Hugging Face Transformers, FAISS, FastAPI, React, Next.js, Node.js, Streamlit, Docker, Google Cloud Platform, Azure OpenAI, OpenAI API, Selenium, BeautifulSoup, Git, Linux.

LEADERSHIP AND AWARDS

Plaksha AI Committee: Student representative for responsible AI policy (Jan 2026 – Present). **Junior Teaching**

Assistant: Mentored 80+ high-school students (May – Jun 2025).

Awards: 1st Place, Predli AI Case Study Competition (2025); Rise finalist, top 500 of 14,000 applicants (2023); full scholarship, Plaksha University.
